Delafines new bubble bath won't fill baths with handsome strangers.

We've just made a bubble bath which is so good we don't need to make outrageous claims for it.

Our national advertising campaign promises women believable desirable things: rich foam, delicate scent, and a reasonable price.

Now, if you satisfy the demand these ads create, we'll promise you a simple thing too: money.

New *Delafine* Bubble-Bath
Delafine, Thornccliffe, Sheffield.

Mr N. A. Iliff, president at the Chemical Industries Association, forecasts price rises in chemicals (see p 723)

A balanced diet is so important

To stay in peak condition, dogs need a regular supply of nutrients. Canovel is a scientifically balanced vitamin-protein-mineral supplement in palatable tablets specially formulated for dogs.

Canovel tablets should be given daily, to provide the nourishment essential for good health, which is so often lacking in a dog's everyday diet. They are particularly useful for growing puppies, also in pregnancy and lactation and during convalescence.

Canovel is available in canisters of 200 and 1,000 tablets only from chemists and veterinary surgeons.

Public identify 'free films' with Kodak

Kodak Ltd are to exercise stricter control over the use of their trade marks and "trade dress" by promoters of "free film" schemes—but they warn dealers that they cannot prevent the continued expansion of this type of business.

The company was forced to deny any association with free-film operations as recently as July, and at that time the *C&D* reported Kodak's estimate that in 1969, 6 per cent of the colour negative market was held by such "free" offers.

Subsequent analysis has put the figure at nearer 10 per cent, and the latest estimate is that the schemes will have accounted for 16 per cent of the market in 1970. Kodacolor film represents almost half.

Kodak's main concern is that the research shows that 30 per cent of colour negative users are under the impression that the offer of a "free" film is connected with the company. In 1969, the proportion was only 16 per cent. They therefore propose to secure the "close co-operation" of free-film promoters to ensure that the publicity material does not mislead the public.

It is pointed out, however, that Kodak Ltd have no power—and no wish—to stop this type of trading. "Our policy is to encourage picture taking, not to restrain people who promote photography," they say.

In answer to criticism from "conventional" dealers, the company suggests that little is done to tell the public about the benefits of "over-the-counter" D&P. The reason, they surmise, may be that total sales of Kodacolor in 1970 are up 20 per cent on 1969, giving dealers a 16 per cent increase so that they "stop short" of positively promoting their own service to the public.

The cost of medicines

The cost of medicines—excluding dressings and appliances and chemists' fees—accounted for about 9 per cent of the total cost of the National Health Service in England and Wales in 1968-69.

That was stated by Sir Keith Joseph, Secretary of State for Social Services, in reply to a Commons question last week.

Working party: new demand by NEL group

North-east London Pharmaceutical Committee is asking the Pharmaceutical Society, the National Pharmaceutical Union and the Central NHS (Chemist Contractors) Committee to endorse last week's statement by the Linstead working party that it will consider submissions dealing with the planned distribution of pharmacies, where relevant to the NHS contract.

A letter from the Pharmaceutical Committee to the secretaries of the three organisations says that such endorsement will allay the anxieties expressed by NEL and supported by many other committees and branches of the Society.

The NEL committee reports "overwhelming" support for its attempt to get the working party's terms of reference changed.

(See Letters, page 742.)

'Chemicals prices must rise'

Prices of chemicals will have to go up—perhaps at a fairly fast rate if cash flow is to be maintained for the industry's investment programme.

That was the message Mr N. A. Iliff, outgoing president of the Chemical Industries Association, brought to the annual dinner last week. Mr Iliff said that in the past decade, the industry had been able to reduce prices against the general trend, through an enormous increase in the size of production units. But the problems of expansion were now reaching the frontiers of engineering science.

In his speech to the annual meeting, the president had said that an investment of £350m was planned by the industry in each of the years 1971 and 1972. Increasing prices could jeopardise exports, so that des-

Mr N. A. Iliff, outgoing president of the Chemical Industries Association (left), welcomes Mr Reginald Maudling, the Home Secretary, at the association's annual dinner last week (see story, this page)

pite world-wide inflationary trends, there must be an attempt to finance a larger part of wage settlements by increased productivity.

Mr Iliff said the industry was convinced that access to a large tariff-free area with a greater growth rate was essential to its well-being. It had no hesitation therefore in reaffirming its favourable attitude to UK membership of the Common Market.

The Home Secretary, Mr Reginald Maudling, replied to the president's dinner speech with a review of the Government's attitude to industry and investment.

Mr Iliff is succeeded as president by Mr J. H. Townsend, a director of Imperial Chemical Industries Ltd.

Prices firm in second quarter

Selling prices of chemicals during the second quarter of the year were up by 4½ per cent compared with the same quarter in 1969 and provisional figures for the third quarter show an advance of 1¼ per cent over the second quarter.

With the exception of pharmaceutical prices, which dipped slightly, there were general advances in all sectors in both quarters of the year.

According to the Department of Trade and Industry the rise that has taken place in the last year has equalled that for the three previous years.

The output index for pharmaceuticals in the first quarter of the year was 193 and for the second quarter, 205 (1963=100).

Drug companies' returns

Mr L. Pavitt asked the Secretary of State for Social Services in the Commons last week what arrangements he had made to check the accuracy of the levels of expenditure on sales promotion included in the financial returns of drug companies within the Voluntary Price Regulation Scheme.

Mr M. Alison, Under Secretary, replied: "Companies are given detailed notes on the completion of the financial returns and these include a section dealing with sales promotion expenditure. The returns are accompanied by a certificate from independent qualified auditors stating that they have been completed on the basis set out in the notes and by a statement reconciling total costs shown in the returns with the figures appearing in the company's audited accounts. My department's own accountant advisers would be asked to make further inquiries where appropriate."

Mr William Hamilton asked what was the total amount collected in prescription charges in each of the last eight years; and how much he estimated would be collected in each year up to 1974-75.

Mr Gordon Campbell replied: "The National Health Service (Scotland) Accounts for the years 1962-63 to 1968-69 contain figures of prescription charges collected in these years. Income in 1969-70 and 1970-71 is estimated at about £1.8m in each year. I am not yet able to give estimates for later years."

Minister praises pharmacists in Commons debate

"Any profession can have its black sheep, but I would like to take this opportunity to go on record as saying that I am satisfied that the pharmaceutical profession as a whole works with the most scrupulous care in the service of the patient, and the long-standing public confidence in chemists, large and small, metropolitan and high street, is well founded."

That tribute was paid to pharmacists during an adjournment debate in the House of Commons last week. Mr Michael Alison, Under-secretary of State for Health and Social Security, was replying to Miss Mervyn Pike, who raised the question of public concern following assertions of drug substitution by chemists made in *The Sunday Times* and the BBC television programme "24 Hours."

Miss Pike said she had received a large volume of letters on the subject, but also quoted from personal experience: "Only yesterday, when picking up a prescription in a small chemist's shop in London, the person in front of me said to the dispenser: 'Well, I hope this is all right. I hope this is not a substitute.'"

Damaging

"That might be all right when passing the time of day, but it can only do damage to pharmacists in general," declared Miss Pike.

"It is essential that this assertion should be looked at properly. It is in the interests of the chemists, possibly even more than the interests of the general public, the customers, that this situation should not only be fully investigated but that adequate safeguards should be built into the system to enable these fraudulent practices to be rooted out."

Miss Pike listed her three "anxieties" — that the NHS was being systematically defrauded; that the substitute drugs have never been properly tested and might be substandard, and that the "racket" would allow entrepreneurs to make very large profits at public expense.

But most important was the serious effect of the allegation on the good name of retail pharmacists in general.

"I think it will be particularly harmful to the small retail chemist. These are the people I want to see protected as much as possible."

'Extend controls to dispensing doctors'

There must be closer inspection and control at the point of sale, with much heavier penalties imposed on the small minority of chemists who fail to comply with the terms of their contracts and with the ethical code of their profession, Miss Mervyn Pike said in the debate.

"In my view, these controls should apply also to dispensing doctors, who are subject to the same temptations but not, at present, to the inspection and control to which a pharmacist has to submit."

Miss Pike was not critical of the work carried out by the Pharmaceutical Society's inspectorate, but she wanted powers to extend to special tests for pharmacists who might be suspected of deliberate fraud.

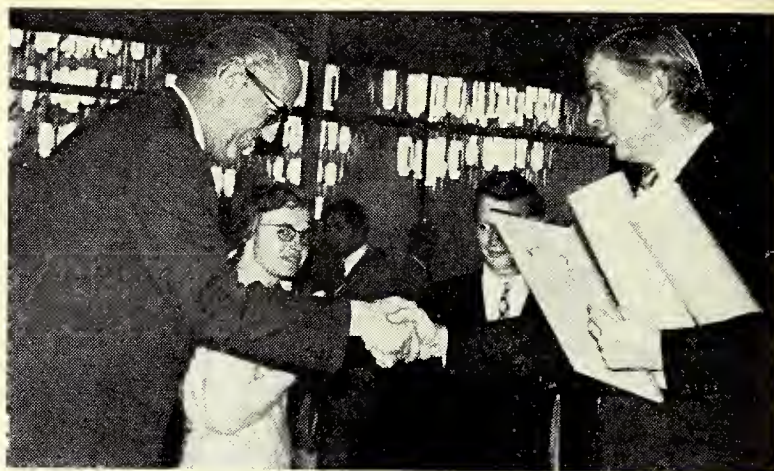

"The Society's inspectors are experienced in the trade and no doubt have a keen nose for smelling out this sort of malpractice."

"Nevertheless, it is not easy for them at the present time to find out those people who are deliberately trying to defraud the Health Service, and it may well be that a reserve power to test prescriptions, or something of that sort, would be a far better and a far closer control."

'Misconceptions were created'

The Under-secretary of State welcomed the "opportunity to clear away some of the misconceptions which have been created by the recent television broadcast and the article which appeared in *The Sunday Times* magazine."

Mr Alison said the central question was whether the patient was getting a proper pharmaceutical service. It

Mr J. B. Evans, product development manager of Smith & Nephew Pharmaceuticals Ltd, (right) receives the Eurostar 1970 Packaging Award which the company won for Minims sterile single-dose disposable eye-drops. On the left is the president of the European Packaging Federation, Dr Herbert Varnecke

would appear from the Drug Testing Scheme that unauthorised substitution of drugs and the dispensing of sub-standard drugs was very rare.

The published allegations had not led to an influx of doubtful prescriptions from patients and doctors for investigation—which might have been expected if substitution were widespread.

Of 5,500 samples taken in England and Wales in 1969, less than 1 per cent had warranted reference to a pharmaceutical service committee; there were 49 breaches of terms of service. In only 12 cases was money withheld from the chemist's remuneration.

Only three cases of alleged unauthorised substitution had come before Executive Councils in the past few years — and they constituted three of the five specific allegations of abuse included in *The Sunday Times* article.

Reimbursement

Mr Alison discussed whether the "right rules" were being used to fix reimbursement rates, and whether operation of the rules enabled chemists to make an undue profit.

Allegations of undue profit concealed two very different questions, and some observers did not distinguish quite clearly enough between them. The first was dispensing illegally or improperly; it was both a professional offence and a breach of terms of service and discovery could lead to heavy penalties, including complete loss of livelihood.

"My Department's concern in these cases is not to stop the pretty minor element of financial loss involved, but to stop the occurrence altogether."

NHS gains from low-cost drugs

Drug Tariff procedures for reimbursement of chemists have advantages for the Health Service, Mr Alison indicated.

"There is nothing wrong or dishonest, or, indeed, even undesirable about the mere fact that chemists sometimes buy drugs—good and wholesome drugs—at prices below those in the Drug Tariff."

"They also sometimes have to buy drugs at prices above Tariff prices. This happens both with proprietary and with non-proprietary products, and in the long run I am sure the Health Service gains from the freedom which enables the individual chemist to use his own expertise as a buyer."

"It introduces a limited but desirable element of price competition which would not be present if we simply reimbursed the cost that the pharmacist says that he has paid."

However, Mr Alison admitted that difficulties arose where a cheap preparation was offered to chemists in one part of the country only. This preparation would not be taken as the "cheapest product generally available" for the purposes of reimbursement.

Concluding the debate, Mr Alison said he hoped the subject had been explored sufficiently deeply "to restore justified confidence in the work of chemists in the British Pharmaceutical Service."

□The Attorney-General has asked the Director of Public prosecutions to consider whether investigations into the allegations in *The Sunday Times* article are justified, and, if so, "to arrange for these to be undertaken," Mr Alison said in the debate.

Pharmacist attacks '24 Hours'

Mr J. W. Hadgraft, chief pharmacist at the Royal Free Hospital, is not satisfied with a reply to his letter in this week's *Radio Times* about the "24 Hours" programme on substitution.

The reply, by "24 Hours" editor Anthony Smith, was merely a reiteration of points made in the programme, says Mr Hadgraft in a further letter to *Radio Times*. He makes four points himself:

□ Brand-names do not protect the public, they only confuse the prescriber, and new medicines legislation will act against the "back street factory."

□ No responsible hospital pharmacist was consulted about purchase of drugs in hospitals.

□ Substitution of one brand for another can sometimes be in the best interest of the patient.

□ A pharmacist found guilty of misconduct is disciplined by a Statutory Committee. "TV editors, producers and reporters need a code of ethics and a similar disciplinary body."

To 'arrive' as scientists

When we can truly control what happens to a drug when it is given to a patient, we will have "arrived" as pharmaceutical scientists, Manchester Pharmaceutical Association's annual prizegiving was told.

Professor P. H. Elworthy, who recently took over as head of Manchester University's pharmacy department, predicted that technological developments on existing dosage forms might bring that situation to reality — even though the development of new dosage forms might be comparatively rare events.

During the past session, the department had had 217 undergraduates and seven research students — twenty papers had been published by members of the teaching staff. Professor Elworthy promised a review of the undergraduate course, and hoped to provide a course leading to MSc by instruction.

The school, he said, should act as a centre providing a pool of expertise, know-how, data and equipment that could be available to assist pharmacists in all branches of the profession.

Mr K. M. Godfrey, president of the Society of Cosmetic Chemists of Great Britain, presents the Hibbott Memorial Prize to Mr D. M. Forbes (see "Honour for a president," this page)

Using preservative in cosmetics

Those who formulate cosmetic preparations should design them so that they can be satisfactorily preserved and much more thought should be given to the multiple use of preservatives in cosmetic preparations, said Dr M. S. Parker, University of Strathclyde, in a paper "The Microbiologically acceptable cosmetic," this week.

He said it was asking a lot of a simple preservative to expect it to ensure a satisfactory performance whatever challenge it had to meet. It was logical to attempt to mask factory deficiencies by hopefully adding preservatives.

He reported that with the ever-increasing complexity of cosmetic ingredients the problem of microbial spoilage was tending to increase.

Dr David Halper, a London consultant, made a plea for the hygienic control of the surroundings in which cosmetics were made.

The papers were given during a symposium on "cleansing" arranged by the Society of Cosmetic Chemists of Great Britain at Bournemouth on November 16.

The development of an anti-bacterial wash and the various cosmetic and bacteriological considerations were described by Dr M. N. Rodger and Mr G. D. Breach, Richardson-Merrell Ltd. They found that a formulation based on synthetic detergents and hexachlorophane 1 per cent and propylene phenoxetol was microbially satisfactory.

The use of enzymes in the biological cleansing of skin was reported by Mr R. B. Christie,

Armour Pharmaceutical Co Ltd, and Mr R. J. Chudzikowski, Rimmel Manufacturing Co Ltd. The paper demonstrated that a mixture of guar-gum, Carbitol, Klucel and triethanolamine provided a suitable base system for a calcium-stabilised mixture of trypsin and chymotrypsin. When diluted with water, it formed a cosmetically acceptable gel that could be easily spread on the skin. A limited trial showed encouraging results, but a larger trial with placebo controls was necessary before firm conclusions of effectiveness can be drawn.

Honour for a president

The Society of Cosmetic Chemists has elected Mr G. A. C. Pitt an honorary member in recognition of his past services as president, treasurer and member of council since 1957.

The election took place at a special meeting, when the president presented diplomas to the successful students who had attended the Society's course in cosmetic science for 1969-70. The Hibbott Memorial Prize for the outstanding

student of the year was presented to Mr D. M. Forbes of Proprietary Perfumes Ltd.

The evening continued with a lecture given by Mr B. H. Kingston, Proprietary Perfumes Ltd, on the "Selection of Naturals in Modern Perfumery." It was the first of a reciprocal series of lectures arranged between the Society of Cosmetic Chemists and the British Society of Perfumers.

Drugs bill in committee

Amendments to the Misuse of Drugs Bill, designed to extend the Secretary of State's powers to collect information to uncontrolled drugs, were approved during the Committee stage last week.

As a result of the change, he would be able to require information on the supply of drugs from any medical practitioner or pharmacist practising in or near an area where there appears to be a social problem caused by the extensive misuse of "dangerous or otherwise harmful drugs."

Mr Eric Ogden secured a promise that the possibility of an amendment to extend the Secretary of State's powers to manufacturers and wholesale dealers would be considered at the Report stage.

□ Mr Sharples, Minister of State, Home Office, told the committee on Tuesday that the Government were considering a call to include "barbiturates and other commonly-used sedatives" in the list of controlled drugs.

Mr W. K. Fitch

Numerous friends of Mr W. K. Fitch, former Editor of the *Pharmaceutical Journal*, gathered at Bloomsbury Central Baptist Church on November 18 for a memorial service.

Among those present were representatives of the Pharmaceutical Society, the International Pharmaceutical Federation, the Middlesex Hospital (of which he was a governor) and his colleagues in pharmaceutical journalism.

Lower sales

The manufacturers of the safety razor sets sold 14 per cent fewer in the July-September quarter compared with the same quarter last year. Nevertheless the value was up by 2 per cent. Production of stainless steel blades was up 3 per cent.

MRC press for more research on drug dependence

A Medical Research Council working party set up to evaluate different methods of treating drug dependence recommends that a full scale clinical trial be undertaken to compare the relative merits of heroin and methadone in the maintenance of heroin-dependent patients.

They state that although there are good and reliable methods for withdrawing patients from heroin the effect is likely to be short-lived unless the patient is highly motivated and has good supportive therapy.

The major problem is not immediate withdrawal but to ensure that the patient does not abuse any other drugs, including alcohol for the rest of his life.

The working party concentrated on heroin dependence as they considered the long-term problems could be similar to those in other varieties of drug dependence.

Two related working parties have also reported, one on epidemiology the other on the biochemistry and pharmacology of drug addiction. The epidemiology working party find that multiple drug abuse is now the rule rather than the exception and that none of the current hypotheses put forward to explain endemic and epidemic drug use is satisfactory.

Recommendations are made on five broad aspects that should be considered in detail—the prevalence of drug taking in the community as a whole, the sources of discrimination of drugs, the natural history of drug-taking, particularly the factors influencing the introduction of a drug-taker to drugs and his subsequent progression or relinquishment, central data collection and monitoring of trends and the refinement of methodology in epidemiological studies.

The biochemistry and pharmacology working party concentrated mainly on methods of detecting drugs of dependence in the body.

They conclude that the main deficiency in this area is the inability to detect certain drugs in urine, blood or tissues either because advanced techniques have not yet been applied or because studies to identify the bio-transformations the drugs undergo have not yet been undertaken.

Famous pharmacy for sale

The pharmacy business established over 100 years ago by the father of William Martindale (of E P fame) and "school" for practical pharmaceutical experience of many famous pharmacists is up for sale.

William Martindale manufactured chemicals and did a wholesale business from premises at and adjoining the present pharmacy which is situated at 75 New Cavendish Street, London W1.

When he died in 1932, Savory & Moore acquired it and has since been run as a branch of S & M. Now it is being offered for sale, without the Martindale name, at £3,000 plus stock.

Chemists' closures

Eleven pharmacies closed down in London during October, and two new premises were opened. In the remainder of England, 31 closed and seven were opened, while in Scotland 11 closed and two opened.

Tightening up on advertising

The Swiss Society of Chemical Industries, which includes pharmaceutical firms, has drawn up a new "Gentlemen's agreement on medical information" and more than 200 firms, mostly small, are said to have signed as "adherents."

The agreement creates a "group on medical information" with a supervisory body and a secretary, responsible to the SSCI itself and its director.

Aim of the group is "to promote and to guarantee to . . . the medical and allied professions a reliable and objective professional information on pharmaceutical products."

It is widely felt that the

Mr Jacques Glain, managing director of L'Oreal, looks on as Miss Lorna Lee and Mr Michael Stylianos take their bow after finishing second in the European professional latin dance championships, which the company sponsored (see page 731)

objective of self-control is to avoid any restrictive governmental move in the field of advertising.

The SSCI Council will create a supervisory body of 5 to 7 men, including one or two pharmacists.

The officials will "supervise in full objectivity and impartiality the observance of the rules of the Code"; "control" or survey mailings by random samplings (all firms being asked to put SSCI on their lists); investigate and take up complaints with the firms concerned to "try to settle each case out of court" and make proposals where cases cannot be resolved through that mechanism.

Firms under criticism may appeal against the new body's decisions before the censure is put on the public record but the decision of the commission of appeal is final.

The rules call for statements on composition, therapeutic effects and indications, administration and dosage, side-effects and precautions and contraindications. Scientific work, whether published or not, must be quoted fairly.

Advertising must not "mislead, either directly or by implication," says the Code. Indications must be strictly limited to those approved by IKS, the governmental drug control agency in Bern.

Finally, manufacturers must ensure that their medical representatives have sufficient technical and professional knowledge to be able "to . . . provide a useful service" and "frequency of calls on doctors and hospitals . . . shall not . . . cause inconvenience."

Ulster report

Belfast prizes awarded

Belfast pharmacy students met the president and Council members of the Pharmaceutical Society of Northern Ireland on November 2 when prizes gained during the 1969-70 session were presented. The president, Mr J. Paul, welcomed the students and staff of the department and presented the Council's medal and prize for distinction in the final year of the degree course to Miss Diana E. McCaughan who also received the Evans Medical prize from Mr A. N. Morrison.

Mr J. A. King received the Council's prizes for pharmaceutical chemistry and pharmacology. Mr King also received the Associates' prize for level 2 from Miss M. J. Watson and the Imperial Chemical Industries (Pharmaceuticals Division) prize for dispensing from Mr J. E. G. Donnelly. Miss Mary Henry received the Associates' prize for level 1 and Miss Joan M. Bryce the Council's prize for pharmacognosy.

Prescriptions dispensed in Northern Ireland during August numbered 708,399 (461,528 forms). Total cost was £579,203, an average of 196.23d per prescription. During June prescriptions numbered 837,069 (545,307 forms) at a total cost of £659,907 averaging 189.21d per prescription and during July 769,714 (497,106 forms). Total cost was £622,750, average 194.18d.

People always have to pay for excess weight

... but how many realise the price? Obesity has hidden dangers. It can lead to high blood pressure, bronchitis, angina and anxiety. It can also worsen many other degenerative disorders.

Dieting alone won't always help. And the stimulant amphetamines are contra-indicated by the recommendations of a BMA Working Party.

So what will help? The answer is Ponderax, a glycoliptic agent which has none of the dangers of stimulant addiction. It does not excite mechanisms involved in the central nervous system. And it helps in the treatment of the hidden dangers of obesity.

More than 150 published papers confirm the glycoliptic (fat mobilis-

ing) action of Ponderax and its proven weight-reducing properties (up to 3.6 lb. a week). There's another big advantage, too. Diagnosis with Ponderax skinfold calipers is more effective than by weighing machine. A new spring-loaded version is now available—more accurate and invaluable as a guide to dosage.

*** Important note:** In view of the growing concern over the misuse of drugs it is important to note that after eight years of widespread international use no case of dependence of any kind has occurred with Ponderax.

PONDERAX[®]

FENFLURAMINE

combats the hidden dangers of obesity

Jeyes pay over £½m for aerosol firm

Jeyes Group Ltd has acquired the whole of the issued share capital of Associated Aerosol Industries Ltd from Thomas Tilling Ltd for a consideration of £650,000 to be satisfied as to part by the payment of £112,445 in cash and as to the remainder by the issue of Ordinary Shares of 5s each of Jeyes. Part of the shares will be issued immediately and the balance in one year's time.

AAI carries on business through its subsidiaries Aerosol Packaging Ltd and Armstrong Laboratories as a contract filler for the aerosol industry and has net assets of approximately £650,000. The net profits, before tax, of AAI in its financial year ended December 31, 1969, amounted to £66,972.

Jeyes Group already own Swallowfield-Serta of Wellington, Somerset, which has a capacity of more than 30-million aerosols a year. The merger, says Mr Ralph Auchincloss, Jeyes' deputy chairman and chief executive, "will provide additional capacity, and enable a degree of rationalisation that will improve profitability. The new company with sales in excess of 50-million aerosols a year will be the largest and most diversified outside of the U.S.

Cox acquire Marns

Arthur H. Cox & Co Ltd, Brighton have acquired Thomas Marns & Co, Rustington.

Mr Thomas Marns, FPS, originally the sole proprietor of this business, joins the Cox board as an executive director with the responsibilities of running the Thomas Marns division at Rustington.

The acquisition enables the Cox Group to expand their business activities and in particular to acquire additional premises to enable production facilities to be brought into line with demand.

For the time being Thomas Marns & Co and associated companies will continue to operate independently and all orders should continue to be sent to Brookside Estate, Rustington.

Astra in Yugoslavia

In partnership with the Yugoslav enterprise, Bosnalijek, AB Astra, Sweden, have worked out plans to start a pharmaceutical house in Yugoslavia. It is believed that their realisation will make Astra the first pharmaceutical manufacturer in the Western world to set up in business inside the Eastern bloc. The new company will be called Astra Farmaceutika.

Astra are expected to hold a 25 per cent

The new premises of Contrapac Ltd and their associate, Hassia Packaging Machines Ltd, at Elgar Road, Reading, which were officially opened recently. Contrapac fill customers' products from bulk into various types of form-fill-seal unit packs

interest in the new company, equivalent for a start to about SKr 1 m. Astra and Bosnalijek will each have two directors on the board. A Yugoslav will serve as president, while Astra will designate the vice president.

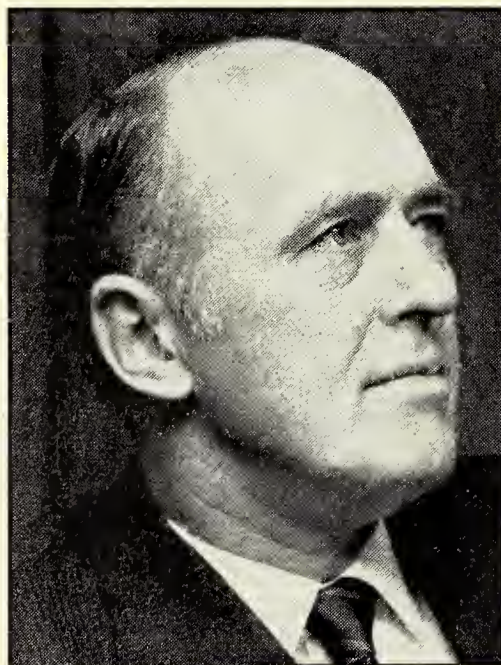

US bid for Dutch firm

Dagra NV of Diemen near Amsterdam and International Chemical and Nuclear (ICN) of Pasadena, California, USA have reached agreement in principle on a bid for the outstanding shares of Dagra. The agreement has still to be approved by the directors, and is subject to the necessary licences. ICN will invite the Dagra shareholders to exchange their shares for ICN shares. The value of the Dagra shares will be set at fl 190 per nominal fl 100 share.

Dagra produce X-ray contrast media and pharmaceutical specialities. The company's production in the cosmetics sector includes aerosols. Dagra achieved a gross profit of fl8.1 m in 1968-69.

In brief

Procter & Gamble Ltd today had a net profit after tax of £2,916,000 for the year ended June 30, compared with £1,313,000

Mr Norman Williams, who has been appointed managing director of Carter Wallace Ltd

for the previous year. Turnover is up from £61.6 m to £66 m. Exports were valued at £7.2 m, compared with £6.4 m for the previous year.

National Starch & Chemical Corporation. Net sales for the third quarter of the company and its subsidiaries were valued at \$33.83m against \$31.41m in the corresponding period of 1969. Net income after tax was \$1.85m (\$1.72m).

Weddel (Pharmaceuticals) Ltd: A new telephone number and postal code are now in operation for the company's head office as follows: Weddel Pharmaceuticals Ltd, 14 West Smithfield, London EC1A 9HY (telephone: 01-248 6411).

The Blake Pharmacy, Boughton, Faversham, Kent, is closing down on November 28; the business will then be transferred to 91 Blatchington Road, Hove 3, Sussex (at present trading as D. P. Fenner Ltd).

Appointments

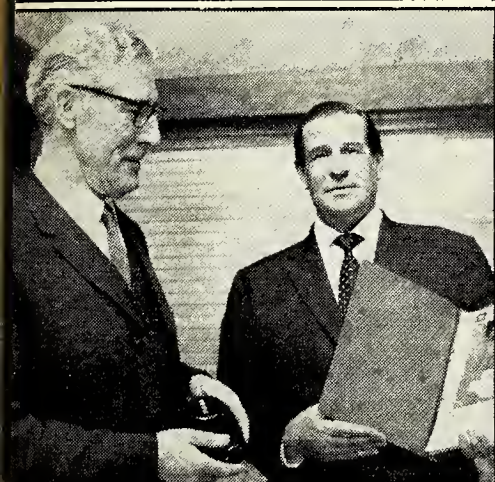

Imperial Chemical Industries Ltd: Mr Jack Callard, a deputy chairman, is to succeed Sir Peter Allen as chairman of the company when Sir Peter retires in March 1971.

Wilkinson Sword Ltd: Mr C. W. K. Saunders, has joined the board. He will remain in his position as secretary to the board.

Kodak Ltd: Mr N. A. Brick, chairman and managing director, is to relinquish both appointments on December 31, in order to take up the appointment of general manager of the European region within the Eastman Kodak international photographic division. The region will direct and co-ordinate Eastman Kodak photographic activities in Europe from offices to be established in London. Mr Brick has been with Kodak since 1933. He was appointed managing director in 1966 and became chairman and managing director last year.

Mr F. J. Moorfoot, MA, will succeed Mr Brick as chairman and managing director from January 1, 1971. Mr Moorfoot, 54, has been with the company for 33 years, is a member of the board and is at present manager of the company's sensitised goods manufacturing plant at Harrow, Middlesex.

PEOPLE

Mr F. R. Law (left), who has retired as marketing director, BDH Chemicals, being presented with a camera and book of signatures by works manager Mr W. G. Moss. A novel feature of the book was that the dedication page followed the style of BDH's "New Entries" leaflet which is mailed to customers. Mr Law joined The British Drug Houses Ltd in 1934 moving to Poole in 1946 on the transfer of the laboratory chemical division

Mr N. J. Van Abbé, FPS, MInstPkg, chief research manager, scientific services, Beecham Products (UK), has been awarded the Harrison Memorial Medal for 1970. This annual award is supported by a fund raised in memory of the distinguished pharmaceutical chemist, Colonel E. F. Harrison.

Mr Van Abbé will deliver his lecture on "Current problems in cosmetic science," at the Pharmaceutical Society's London headquarters on December 2 at 7 p.m.

It is understood that the lecture will seek to demonstrate the close relationship that exists between problems of dermatology, dental science and the pharmaceutical sciences.

Mr D. M. Fenton, managing director, Export Trading Services Ltd has "probably done as much as a 'lone hand' in putting British products on the world map as whole teams of export salesmen" according to a recent issue of the *London Evening Standard*.

Mr Fenton finds British products, often new ones, for manufacturers in Commonwealth countries. His clients are chiefly in pharmaceutical and toiletry industries. After seeing if the product is suitable for their market they usually manufacture it themselves and sell on a partnership basis.

Lord Todd, FRS, Master of Christ's College and professor of chemistry in the University of Cambridge, has been awarded the Copley Medal of the Royal Society for "his outstanding contributions to both the analytical and synthetic chemistry of natural products of diverse types."

The Xrayser column

Take as directed

The Calendar of the Pharmaceutical Society for 1970 has a brief résumé of the Medicines Act of 1968. One of the points made on p 124 of that publication states that the law relating to poisons will cease to apply to medicinal products, and that regulations will be made replacing the various Poisons Rules and Schedules which at present relate to medicines. It is to be hoped that the Council of the Pharmaceutical Society, with all the expert help at its disposal, is studying in detail the future shape of legislation, bearing in mind the inconsistencies and the incongruities of the present tangled web of laws and rules which resemble nothing so much as a skein of wool after a playful encounter with a kitten.

We are all aware of many problems, and we all know that a strict observance of every single detail would result in a breakdown of the dispensing service. It is true, as was pointed out by the Law Committee of the Council, that a prescription for a Schedule 4A drug must, to be in order, include instructions as to dosage. It is also true that dispensing a prescription in the absence of such instruction is illegal. Yet the requirements for a prescription controlled under the Dangerous Drugs Act are less stringent, in that there is no obligation to state a dose.

Pethidine, methadone, dextromoramide and dipipanone do not demand a stated dose. The barbiturates do. But in all that was said in Council's debate on the subject—a lengthy one, to judge by your report—I agree completely with the logic of the case put forward by Mr J. P. Kerr. It is wrong for the pharmacist to add his own interpretation and he must not put himself in the position of accepting such responsibility. Apart altogether from the present rule, the doctor must surely realise that the correct treatment of his patient depends on his knowing how to take the medicine that has been prescribed. The instruction should, therefore, be a written and not a verbal one. It seems little to ask.

Assorted charges

The Council discussed, also, at its November meeting, various matters concerned with the proposed new prescription charges which are to be levied at some future time, not too distant. I note that the members of the general practice subcommittee expressed their opposition both in principle and on the grounds of practicability to any scheme which would seek to relate the levy to be paid to the ingredient cost of the item concerned.

I had hoped to learn more of the further suggestion that the question of income—regardless of age or any of the other grounds for exemption which exist today—would become a factor in claiming exemption from the charges. The accounts I have seen of a statement in the House were vague in the extreme, although reference was made to income and size of family. Are we, in addition to supervising claims for exemption as at present, to become an instantaneous pricing bureau and the agency for carrying out a means test inquisition? It seems to be a comparatively simple matter to cut down expenditure in the public sector if you simply unload the duties on to unpaid shoulders. Never was a display of firmness by the pharmaceutical profession more clearly indicated.

Strong support

I note that Mr S. Day, chairman of the Proprietary Association of Great Britain, has stated in *The Times* that the public would decide where they wanted to buy medicines. "They go outside pharmacies for convenience," he said. "It is nothing to do with safety." Mr Day must be gratified that he has, as an ally, Sir Derrick Dunlop, chairman of the Medicines Commission (last week's *C&D* p 684).

NEW PRODUCTS AND PACKS

Over-the-counter medicinals

Analgesic for children

The DDD Co has introduced Babynos paracetamol elixir paediatric BPC for the "safe relief of pain and feverish conditions in infants and children."

The pack is a 100 ml bottle in a pink and blue carton (5s). (DDD Co Ltd, 94 Rickmansworth Road, Watford, Herts, WD1 7JJ.)

A multi-vitamin preparation

Carlton Laboratories (UK) Ltd, 3 Queen Square, Brighton, have introduced a new multi-vitamin product, Calavite in tablet form. The product is available from all wholesalers, and packs are: bottles of 30 (3s), bottles of 100 (8s), and bottles of 1,000 (65s). (Carlton Laboratories (UK) Ltd, Shelley Road, Worthing.)

Introduced from France

POP, Portuguese Oyster Powder, is said to have been developed by the French biologist and pharmacist, Dr Lucien Marceron, former Chief of the Clinic of the Faculty of Medicine in Paris. It is prepared at the ITC laboratories at Cujan Mestras, France, and is said "to contain all the vitamin and organic elements essential to good health and vitality." POP is supplied in boxes of 100 capsules (126s) or in containers of 150 "pills" (189s). (Distributors, Anthony Young Ltd, 26 Uxbridge Road, London W 5.)

Agricultural and veterinary

One-dose rat killer

Di-Thoxin is a new one-dose rat killer from Gerhardt-Penick. It is said to kill every kind of rat—ordinary rats, "super" rats and warfarin resistant rats within fifteen minutes to four hours with a single dose of as little as two grams (one sachet).

Di-Thoxin incorporates Shoxin norbormide (5-(a-hydroxy-a-2-pyridylbenzyl)-7-(α 2-pyridylbenzylidene) norborn-5-ene-2, 3-dicarboximide) 0.5 per cent. It is specifically fatal to rats but has shown no harmful effect on farm animals, domestic animals or humans. It is also free from secondary poisoning problems, i.e. an animal that consumes the carcass of a rat

that has been killed by Di-Thoxin will not itself die from the effect of the poison. (Gerhardt-Penick, Thornton Laboratories, Purley Way, Croydon.)

Poultry industry's major disease

Marivax, a new vaccine to control Marek's Disease, which is estimated to cost the poultry industry between £10 and £13 m. in losses each year, is announced by Burroughs Wellcome & Co.

It is a viral vaccine designed for active immunisation of potential breeding and laying fowls. It does not produce any visible reaction in chicks vaccinated at day-old and extensive field trials have demonstrated the safety of the vaccine.

Marivax Marek's disease vaccine (Living) is intended primarily for the protection of potential breeding and laying stock; it can also be used for broilers and all types of table chickens.

Marivax is packed in boxes of 5 ampoules, each containing 250 doses. Diluent for each ampoule and other accessories are packed separately. Distribution is through the veterinary profession or direct to hatcheries under veterinary supervision. The maximum cost per dose will be 1s 4d per bird. A scale of quantity and contract prices will operate. (Burroughs Wellcome & Co., Veterinary Division, Berkhamsted, Herts.)

Cosmetics and toiletries

Maws introduction

Maw's Baby Bathcare (5s)—a soothing bath additive which does away with the need for soap, will be available for sell-

ing to chemists from the end of November.

Baby Bathcare is a medicated skin cleanser with a delicate perfume. When it is whisked into the baby's bath water it produces a light, mild lather.

The amber-coloured Baby Bathcare liquid contains a skin softener in addition to anti-bacterial and antifungal agents. The container is unbreakable, being made of semi-rigid plastic.

Baby Bathcare comes in one size only, 180 cc. (Maws Pharmacy Supplies, Aldersgate House, New Barnet.)

Aqua Manda fragrance spray

Aqua Manda fragrance is now available in a spray. The amber glass bottle is embossed with the Aqua Manda pattern of mandarins and parsley flowers. It contains 28 g (10s 10d). (D. R. Collins Ltd, Badminton Court, Amersham, Bucks.)

Remover Pads of Eylure

Eylure have brought out oily nail polish remover pads (4s 9d) "that wipe off nail polish in a second." The pads are non-drying and are specially formulated to use on false fingernails as well as being

uitable for natural nails. Pack is a gay pink and white container.

They have also introduced new eye make-up remover pads (5s 3d). The make-up remover pads are also said to be particularly good in removing eyelash adhesive from your natural lashes quickly and effortlessly. (Eylure Ltd, 8 Grosvenor Street, London W 1.)

Habit Rouge additions

Habit Rouge creme after-shave (31s) is a soothing and healing cream designed to counteract the harsh effects of a razor and the skin-tautness that comes from

hard water. Subtly perfumed with Habit Rouge fragrance it is packed in a squeeze-easy tube, this is for the man who likes to take the sting out of after-shaving.

Habit Rouge Cologne, 3½oz (41s) is a new size in the Habit Rouge collection of Colognes. Packed in a soberly-elegant gilt-capped bottle. (Guerlain Ltd, 22 Aintree Road, Perivale, Greenford, Middlesex.)

Sundries

Medicated tissues

Crookes Comfort (3s 5d), a soft disposable cloth tissue impregnated with a medicated lotion and packed in a small foil sachet,

BEACH SCENE FOR 1971

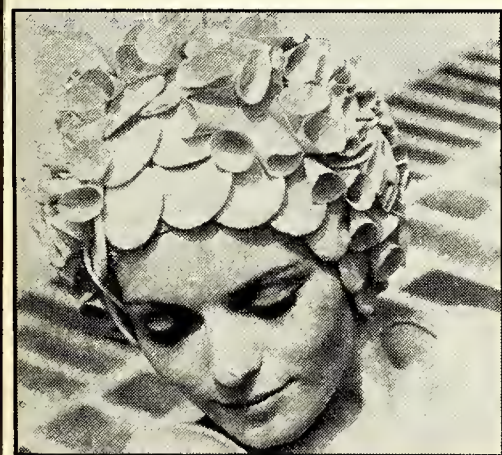

"The pretty look" is how Kleinerts describe their swim hat collection for 1971. There are 42 swim hats ranging from 3s to 60s. All styles come in a "universal size to fit "all heads" except the 1603 model which is in 3 sizes. In many cases a detachable chin strap is offered at no extra cost.

Model No 1662—Sorrento (60s) has dual-coloured trumpet petals in complementing shades clustered together in navy and sky, mango and apricot, rose and soft pink.

In Model No 1654, Bermuda (29s), brightly coloured water lilies cluster together highlighting the feminine look for 1971. Colours are lemon, navy, white and a navy-scandal pink-mango-lemon multi". Layers of dual-coloured "finger" petals cover No 1660, Deepsea Elf (35s), a pixie-

shaped cap. It is ideal for long hair as it has ample room for a top-knot. In three colour combinations, red-white, yellow-white and navy-white.

Then there is Model No 1661, Floral Fireworks (35s), with little roses and then contrasting centres. It is offered in three colour combinations: navy and scandal pink, mango and black, white with scandal pink, yellow, demon green and mango. (Kleinert's Inc, 91 New Bond Street, London W 1.)

Sorrento

Bermuda

Deepsea elf

Floral fireworks

is said to provide "immediate relief from discomfort, help to shrink piles, and ensure scrupulous hygiene." Active ingredients of the formula are lignocaine base, USP, cetylpyridinium chloride BP and ephedrine HCl, BP. (Crookes Anestan Ltd, Rankine Road, Daneshill, Basingstoke.)

Clinique Forever compact

Clinique introduce the Forever compact (170s) their first metal compact. It is a silver-plated, square-shaped "wafer," in a fluted design, slim enough to fit into the smallest handbag, yet holds a generous supply of Clinique's transparent pressed powder. It has a large bevelled mirror and is boxed with its own felt pouch. (Clinique, 71/72 Grosvenor Street, Mayfair, London W 1.)

Additions to wool ranges

Macdonald's of Manchester have introduced as additions to their household cotton wool range; a 50-g and an economy size 200-g pack of pleated cotton wool. Both are presented in hygienic, sealed polythene packs, and provide convenient strips for toilet and baby use.

The company are also for the first time producing a top quality improvement on the ordinary cotton wool ball. It is made from pure rayon and sold under the trade name Snodrops and packed in polythene bags of 50 and 100.

Another Macdonald's introduction is a modern range of polythene packs for their cotton wool/rayon blended rolls. These new packs are also in a new range of sizes — 100, 200 and 400gm and in the popular 1s packs. (Macdonald of Manchester, Portland Mill, Ashton-under-Lyne, Lancs.)

TRADE NEWS

Specialised formula Trufood

Comminuted chicken meat, a specialised formula food developed by Trufood for use in cases of carbohydrate and milk protein intolerance, is now generally available and prescribable on Form EC10.

It is recommended that the formula is not stocked by retailers, but obtained as required from wholesalers or direct. Pack is a jar of 110 g. (Trufood Creameries, Wrenbury, Nantwich, Ches.)

Additional pack of Uniflu

Unigreg Ltd, 15 Worples Road, Wimbledon, London SW 19, have introduced a new small sales pack of Uniflu plus Greg-

ovite C (5s 3d) Each pack contains six each, Uniflu tablets and Gregovite C tablets. The product is recommended for the relief of cold and influenza symptoms.

Price of Minalka

Chemist Brokers, 21a South Street, Dorking, ask us to point out that the ex-wholesale price of Minalka is 430s for two dozen and not as quoted in last week's supplement to the QPL.

Family Doctor booklet on 'sleep'

A new title in the British Medical Association's Family Doctor booklet series is "Sleeping and not sleeping" (2s). Written by Dr I. Oswald, University of Edinburgh, it includes warnings of the dangers of "sleeping pills." Available to members through the National Pharmaceutical Union, 321 Chase Road, London N 14.

Men's toiletries surveys

Television Consumer Audit is undertaking a special survey of the expanding men's toiletries product field over the Christmas period. Consumer purchases will be recorded weekly during the period November 24, 1970 to January 17, 1971.

The report will have separate sections

covering Great Britain, and each of the nine ITV regions, and will be sub-divided into five major segments: pre- and after-shave lotions, shaving soaps and creams, male deodorants, men's talcum powder, men's hairdressings.

A sixth segment will contain separate details of gift pack (coffret) purchases. Cost of the report is £750, and publication date will be late February.

A. C. Nielsen Ltd are also to conduct a nation-wide study in the male cosmetics and toiletries market.

Six product classes, covering over 30 categories are to be surveyed. The investigation will also establish just how important to manufacturers is pre-Christmas spending, said to account for 60 per cent of the annual total.

The market is estimated to be worth £18m annually and manufacturers spent over £1.2m on advertising in 1969.

Bonus offers

Crookes Anestan Ltd, Rankine Road, Daneshill, Basingstoke. Crookes Comfort. Fourteen charged as twelve.

Macdonald & Son, Portland Mill, Ashton-under-Lyne. Household cotton wool 16 oz, 24 (full case) charged as 22; 8 oz, 36 (full case) charged as 33; 4 oz, 36 (half case) charged as 33; 1s size, 72 (half case) charged as 66; 100 g, 36 (half case) charged as 33. PROMOTIONS

Dorothy Gray and "Miss World"

Dorothy Gray makeup was being used exclusively in this week's "Miss World" contest at the Royal Albert Hall.

A team of makeup artists from the House of Dorothy Gray were to create individual "looks" for 64 girls. Leading the team was David Hartnell, fashion makeup designer to the company, and two Hong Kong beauticians dealt with the Eastern contestants. (Dorothy Gray Ltd, Marshall Road, Hampden Park, Eastbourne, Sussex.)

L'Oreal host to dancers

It was an evening of rhythm and colour on November 12 when L'Oreal sponsored the 1970 European professional latin dance championships, organised by the Ballroom Dancers Federation and Rank Leisure Services.

It was the first time the championship had been held in Britain and L'Oreal were the hosts at the Top Rank Suite, London Road, Croydon. The programme was recorded by BBC Television.

The competitors included couples from Austria, Germany, Denmark, Great Britain, Holland, Italy, France, Poland and

Switzerland. The winners were Rudolf and Metchild Trantz of Germany. In second and third places from Great Britain, were Michael Stylianos and Lorna Lee and John and Betty Westley respectively.

Between the events L'Oreal's guests were able to join in the general dancing to music by George Bradley and his band and Joseph's Colours.

The cups and prizes were presented to the winning competitors by Jacques Glain managing director L'Oreal.

Chukka Christmas packs

Nine Chukka panties are being attractively presented in a special Christmas pack, selling at 7s. In addition, the Chukka briefs-for-men twin-pack is again available in a Christmas sleeve (10s for 10). Display material is available (see picture above). (LR Industries Ltd, North Circular Road, London E4 8QA.)

Breck samples in dance halls

Breck Creme Rinse samples are being distributed through 38 Mecca dance halls and Discotheques in England and Scotland during the week commencing December 7. Highlight of this "National Hair Care Week" will be a "beautiful hair contest" in each hall, with prizes for the top ten contestants. (Cyanamid of Great Britain Ltd, Bush House, London WC2B 4PU.)

HAIR DECORATIONS

obtainable from your wholesaler

Fifty years ago Markus Guggenheim – working in the Roche Research Laboratories in Grenzach – first isolated L-Dopa, the substance now widely regarded as the most significant single breakthrough in the whole history of Parkinson's Disease.

Today, Roche Products Limited are happy to announce that Larodopa, the Roche brand of L-Dopa, is now generally available for prescribing both in hospitals and in general practice.*

Larodopa: The Benefits

This is a significant step forward, both in the percentage of patients who can benefit from treatment and in the amount of benefit they can be offered. Two-thirds or more of Parkinsonian patients benefit significantly – often dramatically – in mobility. **Larodopa** is the first treatment – medical or surgical – which reduces the paralysis (akinesia) of Parkinson's Disease as well as reducing the rigidity and the tremor.

Larodopa: Procedure

Dosage starts at a low level, and is increased gradually to match individual needs and response. Dosage may also need to be adjusted to minimize the side-effects which may occur.

Larodopa: Precautions

Side-effects – which are both dose-dependent and revers-

ible – occur in a large percentage of cases. They can be mitigated to some extent by adjustments in dosage. Long-term safety and efficacy have yet to be established.

Larodopa: Full Information For You

Treatment with **Larodopa** is capable of making a quite revolutionary change in the lives of patients with Parkinson's Disease and of their relatives. Roche feel that a responsibility is created by that fact: a responsibility for keeping everyone concerned provided with full and current information about **Larodopa**.

Roche propose to meet that responsibility by offering you a comprehensive information service on **Larodopa**. Details will be announced shortly.

*trade mark for Roche preparations containing L(-)- β (3, 4-Dihydroxyphenyl)-alanine.

COMMENT COMMENT COMMENT COMMENT COMMENT

Too few words

Three hundred words! Enough, in the opinion of the Pharmaceutical Society's Council, for an aspirant to its membership to convince the voter of his or her competence to serve and represent the profession for a term of three years.

Three hundred words is the limit Council puts on the policy statements delivered to the membership by post, and next year candidates are to be asked not to add to their policies by writing letters to the pharmaceutical Press. Thus, the ban operated by its own journal is to be made universal.

No doubt this plea to candidates results from last year's declared intention of the *C&D* to publish such letters, so ensuring the existence of at least one platform for open discussion of what really matters in the election—the policies. We do not intend to change *our* policy in 1971.

In our view, the Council undervalues its importance to the profession if it does not believe that every effort should be made to see that voters have every facility to arrive at a wise choice. We agree that the gaining of advantage by virtue of financial resources or "special influence" must be thwarted, but a "letter in the Press" puts at a disadvantage only those who are unable to argue their case.

A candidate who cannot argue his case to his own profession, and defend it against criticism, must be shown up *before* the election. If elected he may need to argue the profession's case to the leaders of other professions, to government Ministers, to consumer organisations. Therefore, when making a choice, a voter should ask himself: How would this candidate fare against Dr J. C. Cameron of the British Medical Association, against Secretary of State, Sir Keith Joseph? Does he have a policy I can support, and do I trust his ability to represent me?

Are 300 words really enough to provide the answers?

The *C&D* believes the profession needs strong leadership. Our correspondence columns will therefore remain

open to those wishing to oppose policies—and to those willing to defend them. And we shall not be deterred from editorial comment where it would aid the general discussion.

When can you hold a script?

Can a pharmacist refuse to dispense a prescription and at the same time retain it? That is a question raised during recent debates on how far a pharmacist's responsibilities extend. It is also of importance in relation to a branch resolution on endorsement of prescriptions the pharmacist judges he would be ill-advised to dispense.

A legal opinion suggests the answer depends on who owns the prescription. With NHS prescriptions there is no difficulty as they are the property of the Executive Council.

A private prescription does pose some difficulties, however. There is no doubt that the patient is the owner of the prescription, being part of the fee due to the doctor for his diagnosis and treatment. The fact that it is marked "Recipe," a message from the prescriber to the pharmacist, does not affect the ownership.

Although the patient may be the owner, the pharmacist by statutory authority is commanded to retain the prescription in certain circumstances. If, for example, he suspected that the prescription was a forgery he would be entitled to retain it until the police had been informed or other action taken.

Where an unusual or excessive dose had been prescribed, retaining the prescription until the doctor had been contacted would appear to be the exercise of sound professional judgment. It is doubtful whether the courts would condemn an action based on professional judgment, even if it infringed the patient's right of ownership of the prescription, if the judgment was motivated by a desire not to dispense an overdose of a potent drug.

A sound rule would thus seem to be: when in doubt, retain the prescription and contact the prescriber.

BUSINESS Q & A

I employed an accountant whom I thought was qualified but I have now found out that he was not a member of one of the recognised bodies of accountants. Unfortunately he made an error in my accounts of which I was not aware. This has now come to light and the Inspector of Taxes is blaming me. What is my position please?

The first thing you should do is to obtain the advice of a properly qualified accountant. If it can be said that you were negligent in causing incorrect accounts to be submitted to the Revenue you may be liable for interest and penalties by reference to any tax lost. You may also have an action

for negligence yourself against the unqualified accountant.

I am trying to sell my business, but although I have had plenty of interest, very few prospective purchasers are able to raise sufficient capital for the business and the property. If I let the property would I be able to develop part of the garden.

All that would appear to be necessary would be for you to grant a lease of the property which you wish to let. This would involve the preparation of a suitable legal instrument in connection with which the advice of a solicitor would be essential. The lease would be for a term of years which would be stated and one of the terms of the document would be the rent which would require to be paid. The garden could be excluded from the property let and it should be possible for your solicitor to draft a suitable form of licence.

There is a possibility that I will have to give up the family business I manage. I propose doing full time locum tenens duties. Not knowing a great deal about the financial side, I ask your advice. Some locums ask for a fee, plus expenses. Some take a large fee only. Which would you consider the more suitable? Many locums I believe are treated as a one-man business and able to claim car and telephone expenses.

It is normally more beneficial to operate as a free-lance locum tenens in receipt of fees. Those who receive expenses usually do not do this but are taxed under PAYE. If you act as a self-employed person you are entitled to deduct from your gross fee income any expenses wholly and exclusively laid out or incurred for the purpose of earning the fees. You are also entitled to capital allowances for any business use of a car.

PROFESSIONAL NEWS

Pharmaceutical Society
of Great Britain

Council's interim report on branch resolutions

The Council of the Pharmaceutical Society has reported on the result so far of its consideration of the resolutions passed at the Branch Representatives' meeting in May. The report is summarised below.

Council election

That section XII, paragraph 3, of the Society's byelaws should be amended so that greater time should elapse between the closing date for nominations for the Council election, and the date on which voting papers are sent to members.

Council have approved amendments to the byelaws which bring forward the closing date for acceptance of nominations from March 31 to February 28. Voting papers will continue to be despatched on or about April 18. The procedure will be implemented in 1971 if Privy Council approval is received before the end of December 1970.

Amphetamines

That the Society should, in consultation with the medical profession, seek further control on the prescribing of amphetamines. Council were sympathetic to the proposal but felt that subsequent events have made its implementation unnecessary. The Misuse of Drugs Bill is now before Parliament and the medical profession has imposed a voluntary ban on the prescribing of amphetamines.

Instructions on endorsement

That Council should issue instructions to pharmacists as to how to endorse prescriptions which they judge it ill-advised to dispense.

Council agree that the increase of drug abuse makes it desirable that pharmacists should look critically at prescriptions for excessive amounts of drugs and, if necessary, refuse to dispense them. The procedure to be adopted by pharmacists is still under discussion.

Journal cover

That the *Pharmaceutical Journal* should present a more professional aspect of pharmacy to other professional bodies and to members of the public by the elimination of advertisements from the front cover other than ethical advertisements.

The future use of the front cover of the *Journal* is at present under consideration in relation to a proposed change in printing arrangements.

Drugs in hospitals

That a registered pharmaceutical chemist should be responsible for controlling the storage and distribution of drugs in every hospital.

That Council policy. The Working Party on the Hospital Pharmaceutical Service (Noel Hall) said that pharmacists should be deployed throughout each area, and in each section, according to pre-

determined need. Where the work did not justify a full-time pharmacist, arrangements should be such that the pharmacist attended only for appropriate periods.

The working party said also that the pharmacist in charge should lay down the working system for the distribution of drugs and other pharmaceutical products. Issues of Dangerous Drugs should always be made by a pharmacist. A pharmacist should satisfy himself on the method of storage on wards and departments, and on the condition and age of drugs in store.

In July a report on Measures for Controlling Drugs on the Wards was sent by the Department of Health and Social Security to Hospital Boards, etc. It was commended by the Secretary of State "as a model of good practice." Council has decided to seek clarification from the Department on the measures which will be taken under the Medicines Act, 1968, to ensure that the same standards are applied in private hospitals as in National Health Service hospitals. Council consider that a section of the Society's evidence to the Working Party should also be borne in mind. The section is that proposing involvement of the local chemist contractor, where there is a rural or semi-rural area with a small hospital within a unit, at which it is not economically possible to provide a pharmacist staff.

Planned service

That the Pharmaceutical Society should take steps to prevent the opening of new pharmacies in areas which are already adequately served, with a view to establishing a planned pharmaceutical service.

The Committee on a Planned Pharmaceutical Service is considering the planning of pharmaceutical services as a whole rather than only the prevention of the opening of new pharmacies.

In the Committee's report on pharmacies in areas of low population density, it is suggested that, subject to specified conditions, there should be limitation of NHS dispensing contracts in such areas. The resolution will be borne in mind.

Local authority liaison

That the Society should send the various reports produced by the Committee on a Planned Pharmaceutical Service to the appropriate local authorities.

The resolution was adopted by Council. The report dealing with areas of low population density was sent to the County Councils Association and the Rural District Councils Association.

Industrial pharmacists

That Council should consider the possibility of establishing, under section XVII of the byelaws, a membership group of pharmacists employed in the pharmaceutical industry.

Council have asked the industrial practice

subcommittee to consider the possibility in detail and to obtain a realistic assessment of likely support.

Remuneration

That in general practice, the provision of a comprehensive pharmaceutical service should of itself give adequate remuneration to the pharmacist, and that the Society should continually press, by every means at its disposal, to make the provision of such a service financially rewarding.

The motion is in line with Council policy. The report of the Committee on a Planned Pharmaceutical Service in areas of low population density made out the case for subsidies related to the provision of a comprehensive service, particularly where the population is very scattered.

Metric conversions

That Council should now review the official instructions for the conversion of prescriptions to the metric system and make representations to the appropriate Governmental and professional bodies with a view to obtaining a ban on the use of the Imperial or Apothecaries systems in prescribing.

The resolution was referred to a working party with the British Medical Association. The legal position is being considered by the BMA but there was agreement that the object should be to secure co-operation between medical practitioners and pharmacists at local level.

Multi-dose measure

That Council should now bring further pressure on the Department of Health to introduce an official multi-dose measure for use by patients for whom appropriate liquid medicines are dispensed under the NHS.

When the motion was discussed at the Representatives' meeting it was made clear that the intention was that pharmacists should distribute a measure for preparations with an aqueous vehicle having a prescribed dose of 20 ml or more. Council are in favour of accepting the proposal. They considered, however, that doses should continue to be written by pharmacists in terms of 5 ml spoonfuls and that the measure should be graduated from four 5 ml spoonfuls to eight 5 ml spoonfuls at intervals of one 5 ml spoonful. The BMA are prepared to make joint representations with the Society to the Department in line with the suggestion.

Postgraduate courses

That registered pharmacists should be specified in the Health and Welfare Services (Provision of Instruction) Regulations as a class of persons for whom the Secretary of State is empowered to provide financial assistance in the provision of postgraduate courses.

The Department of Health have informed Council that the Ministers have agreed in principle that appropriate amended regulations should be laid before Parliament, and that subject to Parliamentary approval of the amendment there may be limited provision of prototype courses.

NHS contract revision

That immediate negotiations should be opened with the National Pharmaceutical Union and the Central NHS (Chemist Contractors) Committee to set up a working party to take evidence on what changes are necessary and desirable in a new contract.

A working party under Sir Hugh Linstead has been established.

OPEN SHOP

by E. C. Tenner

Loss leader

Mr G. David, chairman of the Central Contractors Committee, is reported as saying in a letter to the Ministry, "The figures that we have show that the service is being carried on at a loss to chemist contractors." After the rather cavalier way in which the Central Contractors Committee has treated the various rebel sectors over this last year, it must have taken a deal of political courage for Mr David to publicly admit this unpalatable fact. Congratulations to him for so doing.

There are, however, certain omissions from his statement, the most important of which is an extrapolation from the available figures to show at which date, approximately, we ceased to find our dispensing labours profitable. It is too much to expect that, coincidentally, we only started to lose money as the figures became available to the Contractors Committee. Perhaps we were losing money even at the time of the last contractors conference; if so, the rejection of the demand for arbitration from the floor, must now, in retrospect, appear to Mr David to be, to say the least, unfortunate.

No one expects perfection from their political leaders. Since they are drawn from ordinary men and women, we realise that they will make mistakes, and as long as they are honest enough to admit them, we will respect them. I am sure that Mr David will emerge from this crisis of confidence with more respect and admiration from the members if a complete statement is made to the contractors as soon as possible. If reputations are to be saved, a frank and fearless statement of the facts must be forthcoming from the Central Contractors Committee.

Prescription charges

It has sometimes been argued that since chemist's remuneration is directly proportional to the number of prescriptions, our objection to prescription charges should be muted, in case a charge of self-interest is made against us. Be that as it may, we should be failing in our duty to those who use the Health Service, if we did not make use of our special knowledge to protest in the loudest possible way.

No other profession involved in the Service has the first hand knowledge of the pharmacist; no other profession sees the effect of this particular problem at first hand.

Even those Members of Parliament who have protested in the House against charges, no matter by which political party they were imposed, have not seen, as the pharmacist has, the actual impact of the charges. They have heard of them, but have not actually been involved, in the difficult and heart-rending decisions which must be made.

Not all pharmacists are, of course, in-

volved to the same extent, but those who serve the poor areas of their community will know exactly what it means in terms of decisions which no one should be asked to make. We should, of course, be grateful that the exemptions are to be maintained, and that the young and the old will continue to be exempt. Nevertheless, it makes a mockery of a Health Service when people can get medical advice without charge, and then a financial barrier put before them and the medicine which has been prescribed for them.

I should have thought that this was a case which would have been fought jointly by doctors and pharmacists, but certainly no thought of a charge of self-interest should deter our profession from raising its voice. We have too much real evidence to offer.

Folly to be wise

One announcement made by Sir Keith Joseph must be welcomed as a wise decision: namely, to build more hospitals. This can certainly be described as wise forward planning, for there can be no doubt that if prescription charges, and especially the proposed cost-related ones, effectively

deter people from obtaining their medicines, they will eventually need hospitalisation, and, presumably, more hospitals.

It is a reversal, of course, of the intended use of the Health Service, which was to treat patients early in the course of a disease, and so avoid hospitalisation. But it is nice to know that Sir Keith knows where his policy is leading, and is legislating for its ultimate end.

The contract

The Society was asked, at its Branch Representatives meeting, to set up a working party to see what changes were necessary and desirable in the NHS contract. The North-east London group have been voluble in their protests regarding the composition of the working party, and to some extent I sympathise — Mr Ross and Mr Sparshott are really too much to swallow. But they should not complain that Mr Idris Hughes has been chosen to represent the dissident factions. That tragedy might have befallen Mr Worby or Mr Evens, and I really think they should congratulate themselves that they are left to snipe from the touchlines, rather than having to prove their worth in responsible work.

If those responsible for setting up the working party had been really wise, they would have appointed either Mr Worby or Mr Evens, and so ensured a split amongst the rebels when the report was issued, or a realisation of the problems involved in meeting, in a working party of this kind, the differing positions of its constituent members.

DECIMAL POINTERS

Change-computing cash systems

For many smaller retail businesses, the cost of decimalisation is an onerous burden. Conversion of old cash registers is expensive and the end product often falls short of their real need, as older machines are seldom suitable.

Geller's new Simplex cash-computing machine has been designed to provide a fast and easy means of adding the value of sales and automatically printing the change due to the customer, say the makers, who will rent it for less than £1 per week, inclusive of service, or sell outright for £74.

Electrically operated, it doubles as a fast add-subtract machine. It is finished in two-tone grey on blue with stainless steel trim on the lockable cash drawer. (Geller (Business Equipment) Ltd, 15 Percy Street, London W1P 0EX.)

Conversion tables in handy sizes

Two new issues of decimal currency tables, both in handy sizes, have been published by HM Stationery Office. They are: *New money conversions* (size 11 x 7½ in) which reproduces the *Shoppers' Table* exactly as it will appear in the official booklet which the Board will send to every home in January and which shows conversions in halfpenny stages from 1d to 19s 11d and the *Banking and*

Accounting table (11¾ x 8¼ in) which shows conversions to whole new pennies of all amounts from 1d to £1. In minimum quantities of ten the prices are 3s and 2s, respectively.

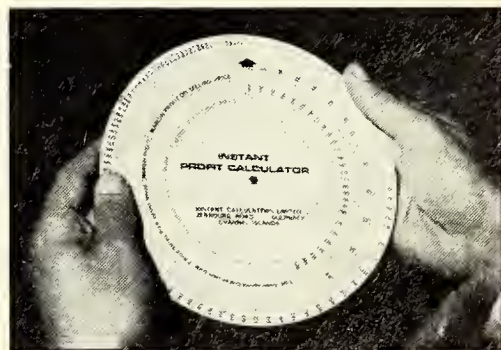

Over 100,000 copies of the present large (30 x 20 in) display version of the *Shoppers' Table* (1s) have been sold.

Instant profit calculations

A disc calculator (43s) which is said to save hours of pricing calculations, and check percentages in seconds has been introduced by Instant Calculators Ltd, Jerbourg Road, Guernsey, Channel Islands. It can be used for all decimal currencies, as well as today's pounds, shillings or pence. The scale covers from 1d to £990.

The calculator simultaneously shows both percentage margin profit on selling price, and percentage mark up on cost price. Discounting calculations can quickly be made up to 60 per cent.

Price, including packing and postage, is £2 3s.

PHARMACY'S BRIDGE OVER 300 YEARS

The Old Pharmacy, 38 High Street, Emsworth, was recently acquired by W. Challice Ltd. and modernised with Counterpoint equipment. This represented quite a transformation as the premises have been a pharmacy since 1812 and Mr J. B. Harries, managing director of W. Challice, thinks that the old fittings dated from about that time.

"Unfortunately," he says, "there was nothing very beautiful about them, except

for the 22ft x 3ft mahogany counter top, which I've put aside. Most customers like the change, but of course some of the older inhabitants would have preferred things to remain the same. The modernisation has not, however, stopped them buying many articles which they would never have purchased in the old shop, where it was impossible to display merchandise, let alone operate self-selection."

Mr Harries is the ex-farmer son of Mr G. J. Harries, who owned the W. Challice

Ltd pharmacy in Villiers Street, London, WC 1, for many years until it was demolished in 1957 for road widening. He then looked after his two pharmacies in Hayling Island, one of which was established in 1934 and the other in 1948, until his son—J. B. Harries—took over in 1957.

Mr Harries' first act on taking over from his father was to double the sales area of one of the Hayling Island pharmacies, and substantially increase the size of the other. His object was, and is, to build up a strong counter trade. "This," says Mr Harries, "is absolutely essential to survival. No pharmacy can trade very successfully if a major section of the business is dependent on NHS sales."

A third pharmacy was acquired in 1967, which was also fitted out by Counterpoint, so the Emsworth pharmacy represents the fourth in this small but thriving "chain."

The Emsworth pharmacy was added to the main building—which is about 300 years old—in 1814. It is complete with a smugglers' passage which leads from the basement to the sea, and a secret staircase leading to an attic watch room which is accessible only from the cellar.

When relaying the floor for the current modernisation, a well was found which had apparently been the village well. It is now covered by white and black flecked lino tiles laid onto concrete. As the old ceiling was in a bad condition it has been boarded and papered over in white. Dado panelling on the walls has been left intact, but is now concealed by the free-standing Counterpoint wall units which are placed round the perimeter, while the frieze above the wall units has been covered with a birch finished hardboard. The exterior, with one display window in front and one to the side, has been left unaltered.

To the right of the entrance are two one-sided mobile gondolas. Their rear forms a back to the side window display, which is accessible simply by moving the gondola, while the shelves on the pharmacy side stock a selection of household toiletries.

A run of three wall units, fitted with open shelving, display baby foods and patent medicines. The wide base shelves are used for bulk items.

One unit along the rear wall is fitted with shelves above and a nest of stock drawers below, while the other unit has open shelving only. The scheduled merchandise here is within the pharmacist's control, emphasised by the nearby solid serving counter, which contains further stock drawers.

Along the left-hand side there is a small photographic section near the pharmacy counter, while the remaining run of five wall units is fitted with a selection of open shelving, glass display cabinets and stock drawers displaying hair lotions, to toiletries and cosmetics.

In the centre of the pharmacy is a double-sided gondola which is stocked with household goods and a further selection of toiletries.

The pharmacy is managed by Mr W. S. McNee, who has been in the Emsworth shop for 23 years.

The Old Pharmacy, Emsworth: the recent interior modernisation is thought to be the first alteration since 1812

**When your breath matters most,
your toothbrush isn't enough.**

You can't rely on your toothbrush to keep your whole mouth as fresh and clean as you'd like it, because there are places deep in your mouth and throat where your toothbrush never reaches. It's here that germs collect in large numbers - the germs that can cause bad breath. You need Listerine. Listerine is a liquid antiseptic mouthwash, that kills these germs by millions on contact. The strong, invigorating taste tells you that your mouth is being thoroughly cleaned and your breath freshened. So, when you've put down your toothbrush pick up the Listerine and rinse and gargle for a few seconds. Be confident you've done a thorough job. Listerine - the world's leading mouthwash.

Listerine Antiseptic Mouthwash - for fresh breath confidence.

LETTERS

The Working Party

As was to be expected in view of the extraordinary exclusion of considerations of planning from the NHS working party's terms of reference, North-east London Local Pharmaceutical Committee has received immediate and overwhelming support from Local Pharmaceutical Committees and Pharmaceutical Society Branches throughout the country; 95 per cent of replies to date are favourable and many offer further support if desired.

We note the recent declaration by the working party of their intention to ignore the restriction in their terms of reference where planning of pharmacy distribution is relevant to contract changes put forward.

Is it not, however, manifestly ridiculous that we now have a working party set up in response to a request to examine all aspects of changes desirable and necessary in our contract, specifically restricted from one vital field by its terms of reference, now openly declaring that it proposes to ignore that restriction. Like the Monopolies Commission we would appear to be in grave danger of ultimately succeeding in foxing ourselves!

Nobody need suffer the indignity of a complete *volta face* in this matter. Nevertheless, in all the circumstances, and particularly in view of the grave anxiety expressed by so many Local Pharmaceutical Committees and Pharmaceutical Society Branches, it would not seem unreasonable to request that all three bodies responsible for setting up the working party should openly endorse Sir Hugh Linstead's statement that the exclusion clause will not be permitted to preclude considerations of planning as part and parcel of new contract proposals.

Such endorsement, from the Society, the National Pharmaceutical Union and the Central NHS (Chemist Contractors) Committee, would allay the anxieties of all concerned and restore the refreshing unanimity of the original Branch Representatives' resolution.

Refusal to endorse Sir Hugh's statement, however, will arouse very widespread suspicion that those involved are being deliberately devious, and the confidence of the profession will be forfeit.

R. G. Worby
Secretary
North-east London Pharmaceutical Committee

Hospital pharmacy

I hasten to reply to your correspondent who hides under the pseudonym "Baffled."

I would have been happier to have seen his "approved name," if only in parenthesis, after his cowardly *nom de plume*.

I am sure my hospital colleagues will

be highly amused at his suggestion that pharmacists join the hospital service to escape work. The ranks are still 20 per cent short on establishment. I am intrigued that "Baffled" suggests "I mind my own business" and then proceeds to want to write my job description.

My job is to provide the correct drugs required, tested for quality to stated standards, at as economical a price as possible. We are not ashamed of our testing laboratories. Our reference analysts are above reproach and not biased. It would appear that sometimes the truth, simply told, hurts.

J. G. Roberts
("approved name")
Chester

["Baffled" is himself engaged in the hospital pharmaceutical service—Editor.]

Marking MAOI

I am glad to see that there is support for the suggestion that containers of preparations containing monoamine-oxidase inhibitors should be boldly marked.

May I go further and ask for an agreed sign, say:

of an agreed size, in an agreed place, on the label.

F. Rogers
Hove

Patient's poser

A patient phoned the doctor acting as locum requesting renewal of her prescription. Since she knew the names of the preparations she could tell the doctor what they were and was able to spell them out. This is the prescription she collected.

130 Sloughs -
15- Lousy.

What the pharmacist dispensed after inquiry is shown at the foot of column 3.

Wanted—a union

It is high time that chemists joined an efficient, reliable trade union. Doctors have seen fit to do so.

It is obvious that we need to join one, as our own representatives seem to be a weak body of men unable to achieve any worthwhile results in their negotiations.

We are being kicked about by everybody. Doctors seem to treat us with contempt and push us around. The Department of Health treats us worse. The House of Commons pass laws that make us a laughing stock with the public, and the Press hold us up to ridicule. Even the chairman of the Medicines Commis-

sion suggests that most medicines should be freely available in sweet or grocery shops.

In Common Market countries chemists are held in high esteem by the community and other professional bodies.

Let's join a strong union, and end this treatment and attitude towards us, which results, I suppose, from the old saying that 'Chemists weigh in minute quantities and think likewise'.

It is time that we occupied the highly respected position (and got paid for it) that chemists do in other countries.

Secundum Artem

Clearing House

For almost a quarter of a century I have paid every account possible through the NPU Clearing House, and I have always made great efforts to pay all accounts in the month following receipt of goods.

Many firms fully realise that payments are made on the 10th of the month and ensure that statements are received by that date, but there are quite a number of firms who are habitually late in sending their account, and then, sometime between the 10th and 20th of the month, a notification is received of an "Overdue Account."

At first, I suffered the "Overdue Account" with hurt pride, then later, I put the odd remark on the statement referring to the Clearing House, but all in vain, I can only assume that the recipient must have put his cup of tea on my remarks.

Presumably some firms believe that they have a monthly issue of Manna from Heaven. They certainly have no idea that the "necessary" originates from the NPU Clearing House.

J. S. Clarke

Tribute to W. K. Fitch

Many tributes have been paid to the memory of the late Mr W. K. Fitch from pharmacists and colleagues who had known him for many years.

May I now pay my personal tribute to a man whom I first met only a short time ago at a meeting of the International Pharmaceutical Federation in Montpelier. By repute, of course, I had known him for many years and it was, therefore, a great pleasure and privilege to talk to him in person then, and at many other meetings in Europe until a month or so ago I met him for the last time in Geneva.

W. K. Fitch, I had been told, was "difficult" and not easily approached. This, I found, was quite untrue, and I would, therefore, like to pay my own respects to the memory of a man who was so charming and kind to me. I am proud to be numbered among the many pharmacists who knew this outstanding pharmaceutical editor and journalist.

C. B. Holliday
Lugano, Switzerland

In case you were unable to "decipher" the prescription in the previous column the preparations required were 30 Slow K and 15 Lasix.

COMPANY PROFILE

Remploy Ltd

For a quarter of a century a British company has been boasting a steady increase in production, in sales and in its labour force and yet has been recording, without apology, a financial deficit every year. This unique organisation is Remploy Ltd and the explanation is that, although it

can be described as big business, it contradicts the normal rules of commerce.

Where, normally, an industrial concern employs people as the means of production and ultimately sales, Remploy has established production units and organised sales as the means to its end, which

is the employment of a greater number of disabled people.

This year, Remploy is celebrating its silver jubilee with an impressive record of achievement to its credit. There are now 86 Remploy factories throughout the country, the company's sales now exceed £9m a year and, most important of all, Remploy keeps some 7,500 severely disabled men and women in useful employment. Approximately 1,500 severely disabled employees join Remploy every year, and nearly 200 each year are able to return to normal work.

The company's factories are not rehabilitation centres nor charitable institutions; they are productive units as much like ordinary factories as it is possible to make them and they operate in competition with industry.

Remploy was incorporated as a company on April 7 1945 and the first factory was opened at Bridgend, Glamorgan, in April 1946, being engaged in woodwork. Three more were to open by the end of that year.

By the end of Remploy's first three years, 66 factories were either in operation or being built and 2,477 severely disabled workers were employed. A sales force was built up at this time but the company only began to operate on its present lines in 1952 when it was divided into five separate manufacturing groups handling among other things shelving and other fittings for pharmacies.

By streamlining production and introducing new techniques the net output per employee has more than doubled in the past 10 years and planning and research departments have been set up to improve productivity still further.

Product design is handled by the company's own design staff, although from time to time outside designers are commissioned to expand a range.

Of all the varied sections of Remploy's industrial output, the Lundia shelving range is perhaps the best known to the majority of pharmacists.

Their range of adjustable shelves, drawer units and sliding door frames which make it possible to refit a shop completely over a weekend have been selected by many retail and hospital pharmacists alike.

The company's activities are controlled by a board consisting of a chairman, managing director, four executive directors, and ten non-executive directors, who are drawn from industrialists and trade unionists having a wide experience in various branches of industry. Appointments to the board are made by the Secretary of State for Employment and Productivity to whom the board is responsible for the efficient management.

The ultimate success of Remploy cannot be gauged from the balance sheet, but from the way it is providing the opportunity for thousands of severely disabled men and women to do a worthwhile job and make a contribution to the prosperity of the nation.

Samples of Lundia shelving are in hospital as well as retail pharmacies. Lambeth hospital pharmacy pictured above is an example

Mr A. Dorling fought with the 8th Army and lost both legs at El Alamein. He has worked at Remploy's Kidbrooke factory for eight years, and from a wheelchair, with a specially designed bench, he attaches metal fittings to shelf ends

MARKET NEWS

D₂ vitamin prices hit the roof

London, November 18: The prices of vitamin D₂ "hit the roof" during the week as production in the UK has stopped and material is being imported from the Continent where much higher rates have been in force. Instead of £7 15s kg the rate is now £18. The anti-Common Market lobby are thus provided with more ammunition for their campaign. Other changes in vitamins included a reduction in the prices of vitamin A (down 5s kg) and pyridoxine (by 10s kg) and another rise in riboflavine (up 15s kg). An interruption in shipping from the port of Tuticorin has caused a temporary shortage of the hand-picked pods and spot is up by twopence lb. The interruption is seen in the accompanying table of shipments for October:—

	UK	US	Europe
	tons	tons	tons
Senna leaves	—	48	—
Pods	—	—	—

Price movements among other drugs during the week included reductions in Cape aloes, dandelion root, quillaia — all on the spot and Costa Rican ipecacuanha and Cochin ginger for shipment. Dearer were senega and cassia *lignea*.
